DO

Personal and Every Day:

Lower thermostats, use CF light bulbs, unplug, garden, use rain barrels and clotheslines, eat local food and less meat, walk, carpool, bike, compost, sew, can and dry food, make do with what you have.

Community and Long-Term:

Organize a fruit/nut tree planting, a bike cooperative, a community garden and compost pile; create rain gardens, raise chickens, sheep, turkeys, cook in clay and solar ovens, install composting toilets; make candles, soap, and tools; join a CSA, start a CSA, make do with what you can gather together and share as a community.

National/Global:

Organize petitions, write to government and business leaders; blog, twitter, facebook, make it viral; attend hearings, advocate for public policy, run for office, vote, make it known that just doing it the same way is unacceptable.
